

CONTENTS

Preface	iii
1 Gaussian measures on Hilbert spaces	1
1.1 Borel measures on Hilbert spaces	1
1.2 Gaussian measures on Hilbert spaces	8
1.3 The Hellinger integral and the Cameron-Martin theorem	16
2 Heat equations in Hilbert spaces	25
2.1 Construction of the heat semigroup	28
2.2 Regularity of the heat semigroup	31
2.3 Solutions of (HE) and eharacterization of the generator of (P_t)	39
2.4 The spectrum of the infinite dimensional Laplacian	42
3 The Ornstein-Uhlenbeck semigroup	45
3.1 The Ornstein-Uhlenbeck semigroup on $C_b(H)$	46
3.2 Sobolev spaces with respect to Gaussian measures on H . . .	49
3.3 The Ornstein-Uhlenbeck semigroup on LP -spaces with invari- ant measure	55
Appendix	73
A.1 The classical Bochner theorem .	73
A.2 Co-semigroups	77
Bibliography	81
