INTRODUCTION	0.1
 CHAPTER I. DEFINITIONS AND BASIC RESULTS	
1. Linear spaces and planar spaces	I.1
2. Steiner systems and t-designs	I.2
3. Incidence structures and diagrams	I.4
4. Planar spaces with isomorphic planes	I.9
5. n-dimensional linear spaces	I.12
6. Metrically regular graphs, association schemes, generalized n-gons and partial geometries	I.13
 CHAPTER II. FINITE LINEAR SPACES WITH METRICAL REGULARITIES IN THEIR INCIDENCE GRAPHS.	
1. Introduction	II.1
2. Graph theoretical background	II.3
3. Terminology and notations for linear spaces	II.5
4. Linear spaces satisfying (D2)	II.6
5. Linear spaces satisfying (D1)	II.14
6. Linear spaces satisfying (D0)	II.18
7. Linear spaces satisfying (I2)	II.34
8. Linear spaces satisfying (I1)	II.42
9. Linear spaces satisfying (I0)	II.43
10. Linear spaces satisfying (ID)	II.48
 CHAPTER III. SOME REGULARITY CONDITIONS IN FINITE PLANAR SPACES	
1. Introduction	III.1
2. Planar spaces in which any line intersecting a plane Π intersects every plane meeting Π in exactly one point	III.2
3. Planar spaces in which any line intersecting a plane Π intersects all planes disjoint from Π	III.8
